EDUCATION

Vistula University

Bachelor of Arts in Computer Science

Warsaw, PL

Sep. 2022 – Present

EXPERIENCE

Frontend Developer

Jan 2022 – Present

Fiverr

Warsaw, PL

- Built full stack websites with the implementation of fully functional shopping systems for ecommerce companies.
- Implemented/debugged numerous UI features and components to the website of a client.
- Explored numerous ways to help customers resolve their SEO issues and codebase.
- Worked with over 50+ customers, which whom I had to maintain constant communication to achieve the envisioned product.
- Taught 2 students the basics of frontend development (Javascript, HTML/CSS) and mentored them throughout the concurrent meetings that were held.
- Designed over 10+ games and developed them using the godot engine with the gdscrip language

Junior Game Developer

Aug. 2022 – Dec. 2022

CouchBroGames

Warsaw, PL

- Implemented complex game mechanics and well structured UI into an upcoming game: Survivor.
- Worked in the prototyping and release of the game: World Of Naples.
- Presented sophisticated and methodical reports explaining features and mechanics that should be added into the project.
- Worked in an agile environment with weekly meetings to present our work through git branches.

Accountant Internship

Nov 2021 – June 2022

Mediterranean Shipping Company

San Pedro Sula, HN

- Collaborated with 3 other juniors with concurrent communication to provide the best customer support possible
- Monitor the status of client's emails in SAP to keep check of their validity

PROJECTS

Feed | *Typescript, Next.js, Auth, React, Firebase, Tailwind*

June 2020 – Present

- Developed an efficient data model to store users, usernames and their different comments and likes throughout the application. In this way, the authentication tokens from Google Firebase were stored safely
- Designed and coded an elegant minimalistic design that works on all kinds of devices.
- Visualized GitHub data to show collaboration
- Programmed a smart and efficient method of data fetching by varying the types of rendering depending on the needs of the page, these tweaks also helped the overall SEO of the website.

Talkanger | *Javascript, React, Socket.io, Node.js, Express, Bootstrap*

May 2018 – May 2020

- Setup constant communication from backend to frontend using websockets.
- Designed the overall website concept/layout using a simplistic and elegant but efficient responsive design.
- Implemented an entire anonymous room system where two computers would connect through sockets to chat.
